Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (1 of 8)

State Participant-Centered Service Plan Title:

Individual Service Plan

a. Responsibility for Service Plan Development. Per 42 CFR §441.301(b)(2), specify who is responsible for the development of the service plan and the qualifications of these individuals (select each that applies):

Registered nurse, licensed to practice in the State

Licensed practical or vocational nurse, acting within the scope of practice under State law

Licensed physician (M.D. or D.O)

Case Manager (qualifications specified in Appendix C-1/C-3)

Case Manager (qualifications not specified in Appendix C-1/C-3).

Specify qualifications:

Social Worker

Specify qualifications:

Other

Specify the individuals and their qualifications:

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (2 of 8)

b. Service Plan Development Safeguards. Select one:

Entities and/or individuals that have responsibility for service plan development may not provide other direct waiver services to the participant.

Entities and/or individuals that have responsibility for service plan development may provide other direct waiver services to the participant.

The State has established the following safeguards to ensure that service plan development is conducted in the best interests of the participant. *Specify:*

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (3 of 8)

c. Supporting the Participant in Service Plan Development. Specify: (a) the supports and information that are made available to the participant (and/or family or legal representative, as appropriate) to direct and be actively engaged in the service plan development process and (b) the participant's authority to determine who is included in the process.

The service plan is developed and completed with the member and their interdisciplinary team consisting of the member, case manager, service providers, and other persons the member chooses. The information is available to the member in the information packets they receive when they apply for the waiver. In addition, for those choosing the

self direction option, member will also work with an Independent Support Broker to assist with development of the independent budget.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (4 of 8)

d. Service Plan Development Process. In four pages or less, describe the process that is used to develop the participant-centered service plan, including: (a) who develops the plan, who participates in the process, and the timing of the plan; (b) the types of assessments that are conducted to support the service plan development process, including securing information about participant needs, preferences and goals, and health status; (c) how the participant is informed of the services that are available under the waiver; (d) how the plan development process ensures that the service plan addresses participant goals, needs (including health care needs), and preferences; (e) how waiver and other services are coordinated; (f) how the plan development process provides for the assignment of responsibilities to implement and monitor the plan; and, (g) how and when the plan is updated, including when the participant's needs change. State laws, regulations, and policies cited that affect the service plan development process are available to CMS upon request through the Medicaid agency or the operating agency (if applicable):

The Case Management Comprehensive Assessment Tool is used to determine the level of Care (LOC) of the member. The Case Management Comprehensive Assessment Tool is initially completed by the Iowa Medicaid Enterprise Medical Services nurse reviewers and sent into IME Medical service for a LOC determination. Annually thereafter the Case Management Comprehensive Assessment Tool is completed by the member's case manager and sent in to IME Medical Services for the continued stay review. The case manager receives the level of care determination from Iowa Medicaid Enterprise Medical Services. The case manager uses information gathered from the assessment and then works with the member to identify individual and family strengths, needs, capacities, preferences and desired outcomes and health status and risk factors. This is used to identify the scope of services needed. The Interdisciplinary team completes a service plan that identifies the needed services, amount and duration for the member. The service plan is also reevaluated at a minimum annually or when the individual needs change.

Effective July 1, 2014, the ID waiver program began to use the Supports Intensity Scale (SIS) assessment with members accessing the ID waiver. The SIS is a unique, scientific assessment tool specifically designed to measure the level of practical supports required by people with intellectual disabilities (i.e., mental retardation) to lead normal, independent, and quality lives in society. The use of the SIS with ID waiver members will be transitioned in over a three year time period with 1/3 of the ID wavier population being assessed using the SIS each year. The SIS must be completed for each member once in a three year time period. During the two "off" years, a core standardized assessment (CSA) tool will be used for the annual CSR. A request for proposal has been issued to establish a contract to implement the use of the SIS for the ID waiver. A new CSA, to be determined by the new contractor in the future, will be used for the annual CSR. The SIS is for use with adults with intellectual disabilities. A SIS for children is being piloted and it is anticipated it will be ready for use by 2015. Until such time the new CSA will be used for the annual CSR for children.

The case manager informs the member and Interdisciplinary Team of all available non-Medicaid and Medicaid services including waiver services. The case manager will also discuss with the member and team the self-direction option and give the member the option of self-directing services available. The member and the Interdisciplinary Team choose services and supports that meet the member's needs and preferences. This becomes part of the service plan. The service plan shall include:

- 1) All Medicaid and non-Medicaid services and supports
- 2) The funding source for each service and support
- 3) The name of the service provider responsible for providing the service
- 4) Who is responsible for implementing each goal on the plan. The responsibilities of the member, case manager, providers and others involved in the service plan will be outlined
- 5) Time frames and frequency for each service
- 6) Health and safety concerns, including an emergency backup plan

The case manager will be responsible for coordination, monitoring and overseeing the implementation of the service plan including Medicaid and non-Medicaid services. The service plan is reevaluated at a minimum annually or when the member's needs change.

If a member chooses to self direct, the member, with the help of a case manager, will identify the independent

support broker. This selection will also become part of the service plan. The independent support broker helps the member plan for their individual budget, which is independent of the plan developed by the case manager.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (5 of 8)

e. Risk Assessment and Mitigation. Specify how potential risks to the participant are assessed during the service plan development process and how strategies to mitigate risk are incorporated into the service plan, subject to participant needs and preferences. In addition, describe how the service plan development process addresses backup plans and the arrangements that are used for backup.

During the evaluation/reevaluation of level of care, risks are assessed using the Home and Community Based Comprensive Assessment form. A summary of the assessment becomes part of the service plan. The case manager, the member and the Interdisciplinary Team address any risks as part of the service plan development and create a plan to mitigate risks including designating appropriate service providers who are available to reduce risk.

Personal Emergency Response and Portable Locator Services are available services under the waiver and it is encouraged that these service be used as part of emergency back up plan when a scheduled support worker does not appear. Other providers may be listed on the service plan as source of back up as well. All members choosing the self direction option will sign an individual risk agreement that permits the participant to acknowledge and accept certain responsibilities for addressing risks.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (6 of 8)

f. Informed Choice of Providers. Describe how participants are assisted in obtaining information about and selecting from among qualified providers of the waiver services in the service plan.

The member is informed of their choice of providers when the services plan is developed. All available qualified providers are identified to the member and their Interdisciplinary Team. Members are encouraged to meet with the available providers before choosing a provider. Members are not restricted to choosing providers within their local community. Information about qualified and accessible providers is available to members through their case managers, service workers, and the IME website.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (7 of 8)

g. Process for Making Service Plan Subject to the Approval of the Medicaid Agency. Describe the process by which the service plan is made subject to the approval of the Medicaid agency in accordance with 42 CFR §441.301(b)(1)(i):

The IME has developed a computer program named the Individualized Services Information System (ISIS) to support HCBS programs. This system assists the Medicaid agency and the case manager with tracking information, and monitoring and approving the service plan. Through ISIS, the case manager authorizes service and service payments on behalf of the member. There are certain points in ISIS process that require contacting the designated Iowa Department of Human Services central office personnel. The case manager is responsible for the development the service plan and the service plan is authorized through ISIS, which is the Medicaid Agency. (Refer to appendix A and H for ISIS system processes.)

On a monthly basis, the IME Medical Services unit conducts service plan reviews. The selection size for the ID waiver (as well as all other waivers) has a 95% confidence level. This info is reported to CMS as part of Iowa's performance measures.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (8 of 8)

h. Service Plan Review and Update. The service plan is subject to at least annual periodic review and update to assess the appropriateness and adequacy of the services as participant needs change. Specify the minimum schedule for the review and update of the service plan:

Every three months or more frequently when necessary

Every six months or more frequently when necessary

Every twelve months or more frequently when necessary

Other schedule

Specify the other schedule:

i. Maintenance of Service Plan Forms. Written copies or electronic facsimiles of service plans are maintained for a minimum period of 3 years as required by 45 CFR §92.42. Service plans are maintained by the following (check each that applies):

Medicaid agency
Operating agency
Case manager
Other
Specify:

Appendix D: Participant-Centered Planning and Service Delivery

D-2: Service Plan Implementation and Monitoring

a. Service Plan Implementation and Monitoring. Specify: (a) the entity (entities) responsible for monitoring the implementation of the service plan and participant health and welfare; (b) the monitoring and follow-up method(s) that are used; and, (c) the frequency with which monitoring is performed.

During the evaluation/reevaluation of level of care, risks are assessed using the Home and Community Based Compressive Assessment form. A summary of the assessment becomes part of the service plan. The case manager, the member and the Interdisciplinary Team address any risks as part of the service plan development and create a plan to mitigate risks including designating appropriate service providers who are available to reduce risk.

Intellectual Disabilities Waiver case managers are responsible for monitoring the member's health, safety and welfare. They are also responsible for the following:

1. Monitoring service utilization

2. Making a face-to-face visit to the member at least quarterly and a collateral contact concerning the member at least monthly. In addition, case managers must make at least one contact per month with the member, member's representative, member's family, or service provider. IAC 90.5 states the following: The case manager shall perform activities and make contacts that are necessary to ensure the health, safety, and welfare of the member and to ensure that the service plan is effectively implemented and adequately addresses the needs of the member.

3. Developing, approving and revising the service plan in coordination with the interdisciplinary team at least annually or as member's needs change. If services have not met the member's needs, the plan is changed to meet those needs. The effectiveness of the emergency backup plan is also addressed as the service plan is developed and revised.

The member, or their legally responsible guardian, is encouraged during the time of the service plan development to call the Case Manager if there are any problems with either Medicaid or non-Medicaid services. The CM is responsible for conducting the assessment of need and identifying and authorizing services to get needs met. If there is a change in the member's need at any time, the member should be communicating with the CM to address the identified need. CMs are required to have quarterly face-to-face meetings with a member and monthly collateral contacts. This is designed to allow regular communication for any changing needs that may arise. The Case Manager will follow up to address any service related issues. Monitoring service utilization includes verifying:

- 1. That the member used a waiver service, at a minimum of once a calendar quarter
- 2. That the services were provided in accordance with the individual service plan
- 3. That the member is receiving the level of service needed.

The member will first address service planning problems with the CM working directly with the member. CM units have processes in place to responds to member problems and complaints. CM units have a formal grievance process, with actions steps and timelines for response, in place to address any disagreements that cannot be resolved at the CM level. All adverse actions taken by a CM may be appealed by the member according to DHS appeal process in Ch. 7 and identified on all NODs with adverse actions.

The Iowa Department of Human Services has developed a computer program, the Individualized Services Information System (ISIS), to support waiver programs. This system assists the Medicaid Department and the case manager by tracking information, monitoring services, assuring services were provided, and authorizing payments on behalf of the member. The case manager has access to a variety of tools in ISIS to assist with monitoring, including report functionality and claims queries. Many of these tools can be used for a quick review or to generate a report spanning a time frame. ISIS can be accessed as frequently as desired by the case manager. ISIS allows case managers to view service plans both current and past, and paid claims history as related to accessed services. If the member is not receiving the services according to the plan of care or the services are not addressing the assessed needs, the case manager will contact the member and IDT in order to address the situation.

The Department of Human Services, Division of Mental Health and Disability Services (MHDS), is responsible for the oversight of case management services. MHDS personnel regularly reviews all case management entities throughout the state in accordance with the case management standards established in Iowa Administrative Code 441 - 24.4(9) and 441-90.1(249A). Case management reviews assure that case management services are provided according to measureable standards. Deficiencies that are identified during reviews will require corrective actions plans be developed by the case management unit to come into compliance with the case management standards.

The IME Medical Services Unit and the HCBS Specialists monitor service plans during the home and community based services quality assurance review process. During interviews, members are asked about their choice of providers and whether or not the services meet their needs. Emergency backup plans are reviewed for effectiveness.

Monitoring results are compiled by the quality assurance manager. This information is used to make recommendations for improvements and training.

b. Monitoring Safeguards. Select one:

Entities and/or individuals that have responsibility to monitor service plan implementation and participant health and welfare may not provide other direct waiver services to the participant.

Entities and/or individuals that have responsibility to monitor service plan implementation and participant health and welfare may provide other direct waiver services to the participant.

The State has established the following safeguards to ensure that monitoring is conducted in the best interests of the participant. Specify:

Appendix D: Participant-Centered Planning and Service Delivery

Quality Improvement: Service Plan

As a distinct component of the State's quality improvement strategy, provide information in the following fields to detail the State's methods for discovery and remediation.

a. Methods for Discovery: Service Plan Assurance/Sub-assurances

The state demonstrates it has designed and implemented an effective system for reviewing the adequacy of service plans for waiver participants.

- i. Sub-Assurances:
 - a. Sub-assurance: Service plans address all participants' assessed needs (including health and safety risk factors) and personal goals, either by the provision of waiver services or through other means.

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

SP-1a: Number and percent of service plans reviewed which address the member's assessed health risks. Numerator = # of reviewed service plans addressing assessed health risks Denominator = # of reviewed service plans.

Data Source (Select one): Record reviews, off-site If 'Other' is selected, specify:

Member service plans are reviewed at a 95% confidence level on a three year cycle. Data is inductively analyzed and reported to the state.

Responsible Party for data collection/generation (check each that applies):	Frequency of data collection/generation (check each that applies):	Sampling Approach (check each that applies).

e. Sub-assurance: Participants are afforded choice: Between waiver services and institutional care; and between/among waiver services and providers.

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

SP-1e: Number and percent of members whose enrollment indicates that a choice was offered between waiver services and institutional care. Numerator = # of member enrollments indicating choice between waiver services and institutional care Denominator = # of member enrollments.

Data Source (Select one):

Program logs

If 'Other' is selected, specify:

Data is pulled from ISIS reports to indicate that the milestone was affirmed by the case manager that choice was offered between waiver/institutional care. Data inducitvely analyzed.

ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

The Medical Services Unit utilizes criteria to grade each reviewed service plan component. If it is determined that the service plan does not meet the standards for component(s), the case manager is notified of deficiency and expectations for remediation. Development of a mechanism to collect service worker remediation request response is in development.

The HCBS Quality Oversight Unit has identified questions and answers that demand additional attention. These questions are considered urgent in nature and are flagged for follow-up. Based on the responses to these flagged questions, the HCBS interviewer performs education to the member at the time of the interview

and requests additional information and remediation from the case manager.

General methods for problem correction at a systemic level include informational letters, provider trainings, collaboration with stakeholders and changes in policy.

b. Methods for Remediation/Fixing Individual Problems

i. Describe the State's method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the State to document these items.
